

CPCA Toolkit Outline

Gap Analysis Tool

A quick and easy check list that serves a dual function – helps those who have started their emergency planning to identify gaps, and provides an overview of many of the important aspects of a robust emergency plan to individuals new to EP

Identify gaps in emergency operations planning?

Identify gaps in response capability?

Identify gaps in community integration?

Identify gaps in finance and administration?

Hazard Vulnerability Analysis Tool

A great first step before beginning an EOP. Helps individual facilities identify those hazards that are likely in their particular location so as to better focus their mitigation efforts.

CCHC Drill and Exercise Template

A customizable template that allows individual clinics to develop exercises that specifically target the capabilities they need to practice or evaluate

Community Integration FAQ

Information on why community integration is important, and ways in which clinics and consortia have become involved with their local emergency response plans.

Business Impact Analysis Tool

A great first step before beginning a business continuity plan. Helps facilities identify those processes and functions that are critical to their mission and prioritize recovery efforts.

Emergency Operations Plan Template

Sample Exercises

A series of exercises and drills that other CCHCs have developed and used with success.

MOU/MOA and Contract Templates and Samples

A series of template and sample MOUs, MOAs, and contracts that clinics can use to partner with local and community stakeholders

Continuity of Operations Plan Template

All-hazards plan for continuing business operations, including FAQ sheets on FEMA Reimbursement, SSA waivers, claims submission, and eligibility for response and mitigation grants. (Coming soon!)
